Important Update - Vessel Advisory AL MASHRAB

Due to severe congestion at the Port of Koper and terminal move count restrictions, AL MASHRAB was only permitted to perform a discharge call in Koper to support schedule recovery and maintain network integrity. As a result, planned export loading could not be completed and affected export cargo will be replanned to the next available vessel/voyage.

The vessel was further impacted by delays in the Koper berthing line-up, including congestion caused by multiple vessels awaiting berth. We regret the inconvenience and continue to monitor the situation closely.

Sincerely,

Maersk
