

# Export RRCO Standard Transit Time

EXPORT RRCO ROUTES (TECO)	Current operational TRANSIT TIME (*working days)	Train arrivals after CONFIRMED departure**	Remarks
Madrid - Algeciras (EXP)	5 days	48 HRS after the scheduled DEPARTURE	Departure at 14 hrs or 16 hrs. Arrival on the next day at ISLA VERDE (around 7 hours). A truck transfer is needed to APMT Algeciras from the ISLA VERDE rail ramp
Madrid - Valencia (EXP) - CSP terminal	5 days	24 HRS after the scheduled DEPARTURE	Departure usually at 22 hrs and arrival + discharge in CSP around 13-15 hours on the next day
Madrid - Valencia (EXP) - APMT terminal	5 days	24 HRS after the scheduled DEPARTURE	2 departures: in the morning/late evening. Arrival + discharge in APMT on the next day in the late-evening
Madrid - Valencia (EXP) - MSC terminal	6 days	48 HRS after the scheduled DEPARTURE	There is no rail ramp in MSC. Therefore container will arrive at APMT/CSP + truck transfer to MSC Terminal (handled by Rail Team)
Tarragona - Barcelona (EXP)	3-4 days	24 HRS after the scheduled DEPARTURE	Delays on train discharges in Barcelona terminals are common as trains are hold in CAN TUNIS BARCELONA awaiting for classification and discharge. MAERSK has no decision on this issue as this specific operation is under terminals scope
Zaragoza - Barcelona (EXP)	3-4 days	24 HRS after the scheduled DEPARTURE	Delays on train discharges in Barcelona terminals are common as trains are hold in CAN TUNIS BARCELONA awaiting for classification and discharge. MAERSK has no decision on this issue as this specific operation is under terminals scope
Pamplona - Barcelona (EXP)	4-5 days	24 HRS after the scheduled DEPARTURE	Delays on train discharges in Barcelona terminals are common as trains are hold in CAN TUNIS BARCELONA awaiting for classification and discharge. MAERSK has no decision on this issue as this specific operation is under terminals scope
Bilbao - Barcelona	5-6 days	72h (most common) / 48h (if route is less congested)	Train first discharge in ZARAGOZA + will be loaded in a new train destination BARCELONA. Same delays apply as previous routes to BARCELONA (classification in CAN TUNIS before discharge at terminal)

\*the shortest operational transit time will only apply if volume is low. Otherwise, in normal conditions the largest transit time in the rank will be applied

\*\*except if DEPARTURE date = FRI, container discharge at Rail Ramp is usually on next MON (or TUE if +48hrs of operational transit time) / same applies for FESTIVITIES

## Legend:

EXPORT RRCO ROUTES (TECO)	Rail routes
Current operational TRANSIT TIME (*working days)	<b>operation transit time</b> = for export starts from GATE-IN date in Rail Ramps + first available train + rail transit time + rail discharge + terminal transfer if needed
Train arrivals after CONFIRMED departure	once confirmed the scheduled train you have add the working hours indicated in each case = real transit time
Remarks	specific information for each operational rail discharge / additional general info.
