

Be ready to experience the chill of uninterrupted delivery

Access greater connectivity farm-to-fork with our newest cold storage facility in Wilmington, NC to go **all the way**.

The US cold storage market is poised for unprecedented growth in the coming years. But it comes with its own set of challenges, such as rising energy costs, increasing regulation, and a shortage of skilled workers. To address these challenges, we are investing in energy-efficient technologies as we expand our cold storage footprint across North America.

Introducing Performance Team's new cold storage facility in Wilmington, North Carolina. Located close to the Port of Wilmington, the facility is strategically connected to key markets, grocery distribution centers, and major protein producers in the area.

With end-to-end cold chain solutions and data-led insights, get a connected overview of the movement of your goods to ensure on-shelf availability, minimal handover and reduced wastage.
